

ANESTHESIOLOGY SUPPLEMENT

1. Do you employ, assist or supervise registered nurse anesthetists (RNAs) or certified registered nurse anesthetists (CRNAs)? Yes No
- If yes, complete the following:
- a. RNAs: Number You Employ: _____ Number You Supervise: _____
 - b. CRNAs: Number You Employ: _____ Number You Supervise: _____
 - c. Ratio of anesthesiologists to nurses: Doctors: _____ Nurses: _____
 - d. Are you present during induction? Yes No
If yes, _____% If no, explain: _____
 - e. Are you present during emergence?
If no, explain: _____
 - f. Do the CRNAs or RNAs carry their own professional liability insurance? Yes No
If yes, what limits? _____
If no, is coverage needed? _____
 - g. Do you ever simultaneously bill for “one on one” anesthesia services while you are supervising CRNAs? Yes No
 - h. Do you ever use a nurse without a CRNA or RNA designation as your replacement the operating room? Yes No
If yes, explain: _____
2. Do you employ, supervise, or are you in any way responsible for nurse anesthetists who work outside the hospital arena? Yes No
- a. Surgicenter? Yes No
 - b. Dentist or oral surgeon’s office? Yes No
 - c. Doctor’s office or clinic? Yes No
 - d. Abortion center? Yes No

If you answered “yes” to any of the above (question 2), describe your involvement and whether you are always physically on the premises during the administration of the anesthesia:

3. Do you perform itinerant anesthesia? Yes No
If yes, who is responsible for the patients when you leave the premises?

4. Do you practice chronic pain management medicine? Yes No
If “yes”, please complete pain management supplement.
5. Do you (or your partner) always perform pre-operative evaluation of surgical or obstetric patients (except in emergencies)? Yes No

- 6. Do you ever rely on anyone other than equally credentialed D.O. or M.D. anesthesiologists for back up when you are not on call? Yes No
- 7. Do you provide anesthesia services for obstetrics for physicians other than ACOG board certified physicians such as family practitioners or midwives? Yes No
- 8. Do you provide anesthesia services for bariatric surgical procedures? Yes No
- 9. Please specify any procedures not listed above or not generally considered part of your specialty for which you would like to be insured:

10. Please indicate which of the following levels of sedation you will be administering. Check all that apply:

Minimal sedation: Minimal sedation is a drug-induced state during which the patient responds normally to verbal commands. Cognitive function and coordination maybe impaired. Ventilation and cardiovascular functions are unaffected.

Moderate sedation (conscious sedation): A drug-induced depression of consciousness during which the patient responds purposefully to verbal command, either alone or accompanied by light tactile stimulation. No interventions are necessary to maintain a patent airway. Spontaneous ventilation is adequate and cardiovascular function is usually maintained.

Deep sedation: A drug-induced depression of consciousness during which the patient cannot be easily aroused, but responds purposefully following repeated or painful stimulation. The patient may require airway assistance to maintain a patent airway. Spontaneous ventilation may be compromised/inadequate and cardiovascular function is usually maintained.

General anesthesia: A drug-induced loss of consciousness during which the patient is not arousable, even to painful stimuli. Assistance is required in maintaining a patent airway. Positive pressure ventilation may be required due to depressed spontaneous ventilation or drug-induced depression of neuromuscular function. Cardiovascular function may be impaired.
